GARDEN BOOKS GIVEN LIBRARY

The Bremerton public library has recently acquired several new garden books as gifts from the Bremerton Garden club, it was announced today. These books contain material on all phases of gardening, flower arrangement, color arrangement in the garden and encyclopedias of the garden.

"Rhododendrons and Azaleas," by Bowers, is the most outstanding book in the collection. It has unlimited information on the state flower as well as flowers related to it. Fine illustrations make this book particularly attractive.

"New Flower Arrangement," by Hine, and "Flower Decoration," by Spry, show by combinations of color and variety how effective arrangements can be made. "Color Scheme for the Flower Garden," by Jekyll, gives many practical ideas for the garden enthusiasts. "Aristocrats of the Garden," by Wilson, is valuable both for the information it gives and its illustrations.

Matthews' "Field Book of American Trees and Shrubs" is a workable handbook on its subject. "The Window Garden," by Buxton, tells how to make window gardens as well as suggesting flowers and plants for them.

Sanders' "Encyclopedia of Gardening" is comprehensive and concise, giving practical horticulture at a glance. "The Outdoor Living Room," by Ramsey and Lawrence, gives many worthwhile and practical suggestions for a fine and pleasant garden.
