

Detroit Man Convicted on Treason Count

Detroit, July 3.—(UP)—Max Stephan, the first person convicted of treason under Federal statute in 150 years, faced a maximum penalty of being hanged today for helping a German war prisoner escape.

A federal district court jury decided in an hour and 20 minutes last night that the German-born Stephan was a traitor to the U. S. of which he was a naturalized citizen. The penalty for treason ranges from the gallows to five years imprisonment and a \$10,000 fine.

Stephan, 48, a portly full-faced tanner and restaurant proprietor, solemnly heard the foreman of the jury pronounce him guilty.

When Stephan was arrested for failing, sheltering, entertaining and giving money to Nazi Oberleutenant Peter Krug he boasted that the U. S. would never try him because "the war will be over in two or three months."

Justice department records in Washington showed that Stephan's conviction was the first of its kind since the Whiskey rebellion of 1791. In each case during the rebellion the convicted person was pardoned.

Under-Water Rubber 'Mine' Yields 50 Tons

SEATTLE, July 3.—(UP)—Lake Union's underwater rubber "mine" gave out today after five tons of an estimated 50 tons of the lake bed were reclaimed.

A dredging crew worked for six hours yesterday to add only three tons to the mine recovered Tuesday. The mine was dumped in Lake Union 10 years ago by a manufacturer who converted old tires into rubber shoes. The rubber scrap was believed to have been tied up in 500-pound bales.

The baling wires had rusted apart, evidently, and the rubber, disintegrated by currents and passing boats," the dredging crew said.

Berlin Says U. S. Troops In Egypt Battle

STOCKHOLM, July 3.—(UP)—American troops are fighting with the British in Egypt, Berlin correspondent of the newspaper reported, quoting German advice from Egypt.

The dispatch said the troops were members of the "first American expeditionary corps" and were several thousand strong and well equipped.

Today's reports originated in Berlin and conceivably were disseminated by the German military in hopes of drawing misleading comment from a United Nations source.
